

Allerydyce's
GHOST BOX

Instruction Pamphlet

1912

THANK YOU for purchasing
Allerdyce's patented Ghost Box.

An economical and labour-saving
way of authentically replicating
supernatural and paranormal
phenomena, either at home or in
the field.

Used carefully, Allerdyce's
patented Ghost Box will deliver
results swiftly, measurably and
reliably.

You can trust Allerdyce for a
chill.

HOW DOES IT WORK?

Sound waves lower than 20 hertz
are inaudible to the human ear.

These frequencies are called
INFRASOUND.

Although we cannot hear them,
we still respond to them – at even
low volumes, infrasound waves
create sensations in the listener
of fear, anxiety and dread.

They also produce the
remarkable impression that a
seemingly empty room is
somehow occupied with a
presence.

Allerdyce's Ghost Box is an Infrasound Generator. It has several settings:

DOMESTIC:

suitable for filling a room (up to 300 sq ft) with various levels of Infrasound, to produce Profound Unease, Distress, or Terror.

NIGHT MODE:

a more subtle configuration for disturbing the sleep without producing the same dramatic results as at normal operation.

Excellent for creating uncertainty, Unease, Confusion and weakness of will.

WIDE RANGE & OUTDOORS:

for use only with Allerdyce's Booster Unit, this setting allows for omnidirectional infrasound flooding of an outdoor setting (say several fields or a small village) at a range of up to a mile.

Due to the dispersed nature of the coverage, the results, while not as instantaneous, are certainly dramatic.

Nota Bene:

Before operation, please fit the earplugs provided.

My Allerdyce will be pleased
to furnish you with a full
list of his patented appliances
should you care to call at his
store & offices in The Strand.

Guidance is also available for
those experiencing difficulties
in the operation, maintenance
and implementation of any
equipment purchased.
